PERFECT FOR PACKAGING

- Managing a high volume of artwork is streamlined. Uploaded files are automatically preflighted based on customer intent.

- Smart Review allows for last minute inspection before the job hits the press.

- Build customer loyalty by offering **InSite** Prepress Portal as a value added service.

Software Benefits

Easy customer upload and download	• Upload/download via HTML5 • Automatic processing feedback, including preflight details
Convenient, accurate customer reviewing	• Review and approve pages in Smart Review with HTML5 • Allow multiple stakeholders to comment, review, or chat simultaneously • Zoom in to the pixel level, measure dimensions precisely, check color with a densitometer, and verify color separations • View the full-resolution PDF digital master production file onscreen: pixel-streaming technology allows fast remote viewing of very large files • Preview pages based on Page Sets for accurate reader order for approval, rejection, and more • Review and approve pages/jobs on-the-go on Apple iPad tablets • All activity is tracked: submissions, change requests, approvals, or rejections
Improved customer communication	• Use the Secure Link feature for simplified click-through email access to the system (for uploads, reviews, etc.) without requiring logins or customer accounts
Integrated with Kodak Prinergy Workflow automation	• Automation can begin once the job has been created and files have been uploaded, which includes preflighting • Supports **Prinergy** Workflow 7.5 and 8.0 • Use Rules Based Automation to drive final output once all files have been approved
Branded for your business	• Create branded sites for you and your customers: custom headers, footers, colors, and terminology
System security	• Login-based access (personal user name and password, access to your specific account) • Purchase Card Industry (PCI) compliant
Multilingual support	Chinese (Simplified/Traditional), Danish, Dutch, English, Finnish, French, German, Italian, Japanese, Norwegian, Polish, Portuguese, Spanish, Swedish, Bulgarian, Russian, Turkish, Greek, Czech, Korean

DO EVEN MORE WITH KODAK INSITE PREPRESS PORTAL

• **Kodak Matchprint** Virtual Technology saves time and money on contract proofs by delivering color-accurate soft proofing on calibrated monitors.

• **Kodak Pressproof** Software provides fast, efficient, and accurate color guidance by enabling fully imposed proofs to be loaded at actual size for comparison with press samples.

Produced using **Kodak** Technology.
